i. Items in Accord with Previous Policy

- i. Streets Bill No. 220639: Authorizing the revision of lines and grades on a portion of City Plan No. 27-S by striking from the City Plan the easterly twenty feet wide portion of Swanson Street from Wolf Street to Snyder Avenue, striking from the City Plan and vacating the legally open portion of Vandalia Street from Wolf Street to Weccacoe Avenue, and reserving and placing on the City Plan a right-of-way for sewer and drainage purposes within the portion of Swanson Street being stricken and authorizing acceptance of the grant to the City of the said right-of-way, all under certain terms and conditions, including the dedication to the City of the beds of the remaining unopened portions of Swanson Street from Wolf Street to Jackson Street and from Jackson Street to Snyder Avenue. Introduced by Councilmember Squilla on June 23, 2022.

These actions will facilitate redevelopment of the adjacent site, formerly occupied by the Inoex Chemical Company, into a commercial shopping center. The portion of Swanson Street being stricken will be reserved as a right of way for sewer and drainage purposes. The changes proposed for Swanson Street have been coordinated with the Streets Department's planned Swanson Street improvement project to ensure the City's proposed roadway improvements are accommodated.

Staff recommendation is for approval.

3. Action Item: Amend PCPC's Regulations Related to Submission of Subdivision Plats (Presented by Dave Fecteau)

Staff proposes to amend the Commission's regulations related to submission requirements for subdivisions. The Zoning Code sets the rules for how subdivision applications are processed. The Commission's regulations describe what an applicant must submit so staff can process those applications.

Currently, an applicant must submit a property data map, a preliminary plan, then a final plat.

The proposed change will require an applicant to submit (1) A statement of existing conditions on the property to be subdivided, and (2) A Proposed Development Narrative,

including a statement describing how the subdivision will impact those existing conditions and the applicant's intent in requesting the subdivision. The property data map is what the preliminary and final subdivision plats are based on.

Currently, the property data map must include (1) the names of the applicant, the owner and the design professional who prepared the map, (2) north point, scale and date, (3) tract boundaries with bearings and distances, (4) topography with elevation contours, (4) existing and adjacent streets, (5) locations of watercourses, tree masses, rock outcrops, aboveground and underground utilities, (6) railroads (if any). The proposed change will add easements and other rights-of-way and floodplain information.

When the applicant submits their final plat, they currently must show "Proof of legal or equitable interest in the property in question, such as a fully signed deed, agreement of sale, lease, or similar instrument. All deeds must show a copy of the stamp affixed by the Department of Records as evidence of its recording." The proposed change will delete the requirement for a DOR stamp because recording requirement for subdivision or lot adjustment is already in the Code

Staff recommendation is for approval.
